Experience

Scaler AI Labs

May 2025 – Jul 2025

Summer Intern

Bangalore, India

- Designed and executed test cases for **RL training environments**, validating edge cases, evaluation pipelines, and grading logic; identified **critical defects** in reward functions and collaborated with engineering teams to reduce failure rates across **multiple AI evaluation cycles**.
- Benchmarked **frontier model evaluation systems**, gaining hands-on exposure to **LLM assessment infrastructures**.

Projects

Schedulr – Full-Stack Scheduling Platform | [GitHub](#) | [Live](#)

- Architected a full-stack scheduling platform using **Next.js, TypeScript, and PostgreSQL** with RESTful API design; optimized query execution via indexing and efficient joins, improving API response time by **25%** under **50+ concurrent bookings**.
- Implemented timezone-aware scheduling logic with automatic client-side detection and conflict resolution, reducing double-booking errors by **30%** across distributed users.
- Deployed on **Vercel** with environment-based configuration and GitHub-integrated CI workflow; integrated **NextAuth** for secure authentication and session management.

RepCoach – Real-Time Fitness Tracking System | [GitHub](#)

- Built a real-time web application with a **Flask REST API** backend, exposing endpoints for live pose analysis and repetition tracking via webcam streams processed at **15–20 FPS**.
- Designed computer vision inference pipelines using **OpenCV and MediaPipe**, achieving **85%+ accuracy** in pose classification across 5+ exercise types.
- Optimized frame-level processing and reduced per-frame inference overhead, cutting end-to-end feedback latency by **20%** while maintaining real-time stream continuity.

Technical Skills

Languages: Python, C++ , Javascript

Backend: Flask, FastAPI, REST API Design, API Integration

Databases: PostgreSQL, MySQL

AI / ML: OpenCV, MediaPipe, Scikit-Learn, NumPy, Machine Learning

Tools & Platforms: Git, GitHub, Postman, Linux, Vercel, Docker

Achievements & Certifications

Competitive Programming

[LeetCode](#) | [CodeChef](#)

- LeetCode:** Solved **450+ problems** (200+ medium/hard) and earned **2× 100-Day Badges** (2025, 2026), demonstrating strong consistency in algorithmic problem solving.
- CodeChef:** Achieved a peak rating of **1678** through consistent participation in competitive programming contests.

Oracle Cloud Infrastructure – Generative AI Professional

[Certificate](#) | 2025

- Earned Oracle's professional certification in Generative AI, covering Large Language Models (LLMs), prompt engineering, retrieval-augmented generation (RAG), and AI deployment concepts.

Education

Bennett University

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

Greater Noida, India

Research

Knowledge-Infused Multimodal QA System for Scientific Documents

2026

- Proposed a multimodal AI framework combining text, table, and figure understanding to enable evidence-grounded question answering over scientific PDFs, targeting document intelligence in research workflows.
- Built a Vision-Language reasoning pipeline using multimodal embeddings, cross-modal fusion, and similarity-based retrieval, improving factual answer accuracy on multi-hop scientific queries.
